

Immediate Release

H.I.S.C., Inc/ShopDePalma is Featured in Better Homes & Gardens July 2018 Edition

San Clemente, CA – June 21, 2018

H.I.S.C., Inc, a family owned manufacturer of high quality garden tools and outdoor décor, is in the national spotlight for making a 6 n 1 garden tool, *The Dirty Little Digger*.

The Dirty Digger allows for a lot of torque for all kinds of tasks and strong enough to break down dirt, rocky soil and clay. The serrated edges cut through tough weeds and the pointed tip makes aerating so easy. The defined measurements etched on the scoop ensure accurate planting depths. You can be new to gardening or a master gardener and this will be the tool that will be used the most.

Better Homes & Gardens featured the Dirty Little Digger in their "Tips & Tools" for DIY projects section, page 79 in the July 2018 edition. The reader will read how this "power tool" can be used to divide perennials, break through hard soil, and "dig" in for planting!

H.I.S.C., Inc. is honored to be in the national spotlight with Better Homes & Gardens!
